

## Containment lining systems

Supplying and installing containment solutions for over 20 years.

- A wide variety of applications including attenuation basins and tanks, reed beds, ornamental lakes and numerous others.
- Bespoke liner design - world class material solutions
- Directly employed qualified installation technicians and dedicated project management. Single line responsibility.
- Technical design advice on material selection, performance and application.
- Refurbishment of existing facilities.
- Modular offsite prefabrication available on suitable projects reducing site attendances.
- Working with world leading international geomembrane manufacturers for optimum material choice.

## Containment lining systems materials

 [Click to download specification sheet.](#)

**XR5**

Strong tear-resistant and chemical resistant membrane.

**PAG 750R**

Woven fabric reinforced geomembrane offering optimal puncture and tear resistance.

**PAG Protective Fleece**

(3kN) Non woven needle punched protection fleece.
